

# Sport Media Newsletter

## Special points of interest:

- Sports and Social Media are used together.
- This weeks football games

## #Sports

With the help of Social Media, Sport fans can interact with each other any way possible. There are different types of platforms used in the process, for example, FaceBook, Instagram, Twitter, Snapchat and other types of platforms. Sport Fanatics can use characters or any platform to show support to their favorite teams. According to *Forbes*, "almost every team, league and sports association has a social media profile on Twitter." This makes it easier for the teams to interact with the fans as well. The teams can post pictures of them celebrating a win or having practice and thanking the fans for the overall support they have shown. But not everything said on social media accounts are very positive. At times, fans may

not leave a positive comment for the teams. In the end, that is how social media works; it is used to connect with each other, positive or negative.

## NFL Games

In NFL this week, the match up against the Seahawks vs. the Cardinals happened and only one team came out on top, which were the Seahawks. Sadly, the Chicago Bears did not come close in beating the Packers who won 23-16. The

Saints won by a huge margin, 47-10, against the Bills. For more information on the NFL world, feel free to go to the NFL website <https://www.nfl.com/>. -Both Pictures are from Publisher Clip Art.

## Final Project Organization

### *Sports and Social Media*

## NBA Section

On NBA, November 12, the Celtics beat the Raptors by just one point, 95-94. Detroit won Miami 112-103. Other winners from that night include the Houston Rockets and the Oklahoma Thunder. For Chicago on Saturday was not good, the Bulls got defeated by the San Antonio Spurs. I won't be putting the Final Score since it might be painful to see, especially if you are a bulls fan. It was not a good game for the Bulls. Cleveland won on Saturday, November 11, to the Dallas Mavericks. Final Score was 104-111. For more information on your favorite team, go to <http://www.nba.com/#/> or <http://www.foxsports.com>.

Picture shows a laptop which can be used to search up the NBA scores.

The Final Project Organization is a multimedia use zone. It works with providing a project in demonstrating the use of Multimedia. It gives students the opportunity to show how they view and use multimedia in any way. The project talks about Social media and Sports, so the newsletter shows a bit of information regarding these two topics.
